PROFESSIONAL SUMMARY

Results-oriented Systems & Cloud Infrastructure Administrator with over 4 years of experience administering, maintaining, and optimizing on-premises and cloud-based IT infrastructure (Azure, AWS, GCP). Proven expertise in managing Microsoft Windows Server environments (2016/2019+), Active Directory, DNS, DHCP, and hybrid cloud networking (VNETs, VPN Gateways). Adept at implementing robust business continuity, disaster recovery (DR), and high-availability plans, alongside enforcing strict security controls (RBAC, JIT access, port restrictions). Strong background in automation, Git, continuous delivery, and cloud cost optimization, with a proven track record of liaising with vendors, managing SLAs, and delivering secure, scalable technology solutions aligned with organizational objectives in highly regulated environments.

TECHNICAL SKILLS

Cloud & Virtualization: Microsoft Azure (VNETs, VPN Gateways, VM Scale Sets, Entra ID, Key Vault), AWS (EC2, VPC, Transit Gateway), GCP, VMware vSphere, Microsoft Hyper-V, KVM.

Systems Administration: Windows Server (2012, 2016, 2019+), Linux (Ubuntu, RHEL), Active Directory, DNS, DHCP, IIS, FTP, Failover Clustering, Hybrid Email Infrastructure, Patch & Update Lifecycle Management.

Networking & Security: VPN Connections, Local Network Gateways, JIT Access, Port Restrictions, CIS Benchmark Hardening, RBAC, Zero-Trust Networking, Firewall Configuration.

Automation & CI/CD: Terraform, Ansible, Git, GitHub Actions, Azure DevOps, Bash, Python, PowerShell.

Monitoring & Operations: Prometheus, Grafana, Elasticsearch, Automated Alerting Systems, Capacity Planning, Cloud Cost & Billing Optimization, SLA Management.

IT Service Management: Incident Resolution, Change Management Procedures, Business Continuity/Disaster Recovery (BC/DR), Infrastructure Documentation, Vendor Liaison.

PROFESSIONAL EXPERIENCE

DevOps & Systems Administrator

Davis & Shirtliff | Nairobi, Kenya | March 2026 – Present

Monitor, administer, and maintain on-premises and cloud infrastructure (Azure, AWS), including virtual machines, databases, storage, and automated monitoring/alerting systems to ensure optimal performance and availability.

Spearheaded the migration of three critical business systems (TIMS, DeliveryApp, and CRM) to Azure Kubernetes Service (AKS), managing VM scale sets, image creation, upgrades, and lifecycle management.

Configure, administer, and maintain Microsoft Azure networking components, including Virtual Networks (VNETs), Local Network Gateways, and VPN connections for secure hybrid connectivity.

Manage the day-to-day security of infrastructure by administering Just-in-Time (JIT) access, communication port restrictions, and securing application secrets via Azure Key Vault.

Monitor backup operations and perform data restoration activities for cloud and on-premises servers, spearheading disaster recovery procedures for critical systems to ensure business continuity.

Administer Azure subscriptions, Microsoft Entra ID, and role-based access control (RBAC), ensuring appropriate user access and strict security governance.

Monitor and optimize Azure resource utilization, cloud costs, and billing, successfully stopping pipeline wastage by enforcing development branch limits, improving cost efficiency.

Act as the primary liaison between internal stakeholders and Level 2/Level 3 infrastructure support teams and technology vendors (e.g., Microsoft, Liquid Telecom) to facilitate timely issue resolution.

Develop, maintain, and continuously update infrastructure documentation, including operational procedures, system configurations, Azure Key Vault usage guides, and technical processes.

Manage the patching and update lifecycle for enterprise Windows and Linux environments to maintain security, compliance, and system stability.

AI & Infrastructure Engineer

Kenya Revenue Authority (KRA) | Nairobi, Kenya | January 2026 – Present

Configured, administered, troubleshooted, and supported Microsoft Windows Server environments, including Active Directory, DNS, DHCP, and core infrastructure services.

Monitored server health, performance, and availability, proactively identifying and resolving issues to ensure optimal system performance and adherence to SLAs.

Log, manage, and resolve cloud infrastructure incidents and service requests, ensuring timely restoration of services in line with agreed Service Level Agreements (SLAs).

Prepare and submit periodic infrastructure reports to management on system performance, resource utilization, tasks completed, and resolutions achieved.

Supported user access management and ensured compliance with approved ICT security procedures, observing strict role-based access controls (RBAC) on tax systems.

Supported the implementation of information security, data protection, and backup procedures, enforcing policies to maintain data integrity and audit requirements. E.g., No usage of KRA's sensitive information in AI prompts.

Junior Systems Support Officer

Jomo Kenyatta University of Agriculture and Technology (JKUAT) | Nairobi, Kenya | May 2022 – December 2025

Provided first-line technical support, troubleshooting Microsoft systems, hybrid email infrastructure, student portals, and networking issues.

Assisted in the setup and configuration of multi-user environments, including IP address schemes, DNS, and DHCP services.

Maintained accurate documentation of server infrastructure, configurations, installed services, and assigned roles to support operational continuity.

Maintained detailed asset registers, ensuring all ICT equipment (workstations, servers, switches) was kept secure and accurately accounted for.

KEY INFRASTRUCTURE PROJECTS

Enterprise Multi-Cloud Hybrid Foundation & Virtualization Bridge | Terraform, Azure, AWS, GCP, Ansible

[GitHub DevOps_Cloud_Engineering](#)

Architected a Multi-Cloud Network Foundation: Deployed a non-overlapping, BGP-peered hybrid network across AWS (Transit Gateway), Azure (Virtual Network Gateway), and GCP (HA VPN Gateway), establishing secure, low-latency routing between on-premises environments and public cloud VPCs.

Engineered a Universal Virtualization Bridge: Provisioned a hardened management plane. Utilized Terraform to dynamically generate and inject configuration payloads for hypervisor-specific environments (Libvirt XML for KVM, PSD1 for Hyper-V, Cloud-Init for OCI/HCS, Ansible playbooks for vSphere).

Automated On-Premises Hypervisor Parity: Orchestrated provisioning of local VMs (Ubuntu, RHEL, Windows Server) via Vagrant. Developed comprehensive Ansible playbooks to enforce CIS-compliant OS hardening and install hypervisor integration tools.

Implemented Policy-as-Code for Identity Governance: Designed declarative JSON/YAML policies defining hybrid identity synchronization, OU filtering, SCIM endpoints, and least-privilege RBAC mappings across AWS IAM, Azure Entra ID, and GCP IAM.

System Monitoring, Maintenance & Security Implementation | Prometheus, Grafana, Windows/Linux, Azure

Monitored and maintained ICT systems, servers, and databases, configuring network devices to ensure optimal performance.

Enforced strict information security and data protection procedures, such as securing application secrets in Azure Key Vault and implementing secure backup routines.

Generated monthly ICT performance and support reports for management, optimizing cloud resource usage by enhancing CI/CD pipelines to terminate automatically upon stage completion, preventing unnecessary compute costs.

EDUCATION

BSc Computer Science, First Class Honors

South Eastern Kenya University | Graduated October 2022

Relevant Coursework: Distributed Systems, Networking, Software Engineering, Database Systems, Algorithms & Data Structures.

PROFESSIONAL CERTIFICATIONS

(Practical equivalents to MCSE / Azure Administration through advanced, production-level hands-on cloud and systems administration)

Cisco Certified Network Associate (CCNA) Track

- CCNA: Switching, Routing, and Wireless Essentials | Issued Jul 2026
- CCNA: Introduction to Networks | Issued Jul 2026
- ICTA: Enterprise Networking, Security, and Automation | Issued Jul 2026

Security, Cloud & Automation

- Introduction to Cybersecurity | Issued Feb 2026
- Digital Safety and Security Awareness | Issued Feb 2026
- Python Essentials 1 & 2 | Issued Jan 2026
- Introduction to Modern AI | Issued Feb 2026

KEY COMPETENCIES

Problem-Solving & Troubleshooting: Excellent analytical skills to diagnose and fix complex infrastructure, server, and network issues independently, ensuring rapid restoration of services.

Communication & Interpersonal Abilities: Proven ability to communicate complex technical issues clearly to both technical and non-technical audiences, and act as an effective liaison with vendors and stakeholders.

Attention to Detail & Risk Awareness: Strong focus on security governance, change management procedures, and maintaining accurate, audit-ready infrastructure documentation.

Adaptability & Innovation: Continuously seek opportunities to automate manual tasks, optimize cloud costs, and implement modern continuous delivery practices to improve system efficiency.

Integrity & Accountability: Committed to delivering secure, reliable, and compliant technology solutions that directly support business operations and organizational objectives.

REFEREES

1. Mr. Ken

Supervisor, Kenya Revenue Authority (KRA)

Cell: 0701 416 600 | Location: Nairobi, Kenya

2. Mr. Robert

ICT Lead, Davis & Shirtliff

Cell: 0107 219 025 | Location: Nairobi, Kenya

3. Mr. Migwi

Head of Information Systems Department, IEET

Jomo Kenyatta University of Agriculture and Technology (JKUAT)

Cell: 0722 507 887 | Location: Kiambu, Kenya
