PROFESSIONAL SUMMARY

Dedicated and proactive System Administrator with over 4 years of experience managing enterprise servers, networks, and cloud infrastructure. Proven expertise in Windows/Linux OS administration, Active Directory, user access management, backup/disaster recovery planning, and vendor coordination. Adept at leveraging Infrastructure-as-Code (Terraform, Ansible) and cloud platforms (Azure, AWS) to automate system updates, enforce CIS security best practices, and ensure high availability. CCNA-certified professional committed to maintaining robust IT policies, documenting system configurations, and delivering exceptional technical support to ensure seamless business operations.

TECHNICAL SKILLS

Systems Administration: Windows Server, Linux (Ubuntu/RHEL), Active Directory, User Access Management, Backup & Disaster Recovery Planning, Azure Key Vault.

Cloud & Virtualization: Microsoft Azure, AWS, GCP, VMware vSphere, Microsoft Hyper-V, KVM/Libvirt.

Networking & Security: Cisco Routing & Switching (CCNA), TCP/IP, DNS, DHCP, Firewalls, VPNs, CIS Benchmark Hardening, Zero-Trust Networking.

Monitoring & Automation: Prometheus, Grafana, Terraform, Ansible, Bash/Python scripting, CI/CD Pipelines.

IT Service Management: Technical Support & Troubleshooting, Vendor Coordination, Asset & Inventory Management, ITIL Principles, Comprehensive Documentation.

PROFESSIONAL EXPERIENCE

DevOps & Systems Administrator

Davis & Shirliff | Nairobi, Kenya | March 2026 – Present

Manage and maintain enterprise servers, networks, and cloud infrastructure, ensuring high availability and optimal performance for mission-critical systems.

Spearhead backup strategy planning and disaster recovery procedures for critical systems, including Customer Ticketing, Tax Invoice Management System (TIMS), and CRM.

Manage user accounts, access controls, and system permissions across platforms like Business Central, Human Resource Management Systems (HRMS), and Microsoft 365.

Coordinate with key vendors and service providers (e.g., Liquid Telecom, Microsoft) for IT-related procurements, licensing, and technical support.

Monitor system performance using Prometheus and Grafana, proactively resolving production incidents and optimizing resource utilization.

Enforce strict information security procedures, securing application secrets in Azure Key Vault and preventing exposure in source code.

Document system configurations, procedures, and troubleshooting steps (e.g., Azure Key Vault usage guides) to ensure knowledge sharing and compliance.

Automate repetitive operational tasks using Python, Bash, and Terraform, significantly reducing manual toil and improving deployment velocity.

ICT Support & Infrastructure Officer

Kenya Revenue Authority (KRA) | Nairobi, Kenya | January 2026 – Present

Supported user access management and ensured compliance with approved ICT security procedures, observing strict role-based access controls (RBAC) on tax systems.

Performed routine system maintenance, updates, and physical network repairs, including crimping Ethernet cables to ensure reliable network connectivity.

Assisted in generating bi-monthly ICT performance reports detailing tasks completed, issues faced, and resolutions achieved for management review.

Supported the implementation of information security, data protection, and backup procedures, enforcing policies against the use of organizational secrets in AI prompts.

Provided technical support and troubleshooting for IT-related issues, resolving hardware, software, and network incidents for internal staff.

Junior Systems Support Officer

Jomo Kenyatta University of Agriculture and Technology (JKUAT) | Nairobi, Kenya | May 2022 – December 2025

Provided first-line technical support to students and staff, resolving issues related to Microsoft systems, portal access, and networking.

Maintained the LAN and associated components (switches, structured cabling), ensuring performance, security, and throughput.

Assisted in the setup and configuration of multi-user environments, including IP address schemes, DNS, and DHCP services.

Maintained detailed asset registers, ensuring all ICT equipment (workstations, servers, and peripherals) was kept secure and accurately accounted for.

KEY PROJECTS

Enterprise Multi-Cloud Hybrid Foundation & Virtualization Bridge | Terraform, Ansible, AWS, Azure, GCP

[GitHub DevOps_Cloud_Engineering](#)

Architected a non-overlapping, BGP-peered hybrid network across AWS (Transit Gateway), Azure (Virtual Network Gateway), and GCP (HA VPN), ensuring secure, high-availability routing.

Engineered a Universal Virtualization Bridge: Provisioned a hardened AWS EC2 Bridge Node acting as a centralized management plane. Dynamically generated hypervisor-specific configuration payloads (Libvirt XML for KVM, PSD1 for Hyper-V, Cloud-Init for OCI) using Terraform.

Automated On-Premises Hypervisor Parity: Developed comprehensive Ansible playbooks to enforce CIS-compliant OS hardening (sysctl, UFW/firewalld, auditd) and installed hypervisor integration tools (`open-vm-tools`, `hyperv-daemons`) on Ubuntu, RHEL, and Windows Server VMs.

Established Bidirectional Hybrid Telemetry: Configured secure TLS connections (Port 8443) and WinRM endpoints from on-premises hypervisors back to the AWS Bridge Node, enabling real-time VM state synchronization and cross-cloud orchestration.

Implemented Policy-as-Code for Identity Governance: Designed declarative JSON/YAML policies defining hybrid identity synchronization, OU filtering, and least-privilege RBAC mappings across AWS IAM, Azure Entra ID, and GCP IAM.

System Monitoring, Maintenance & Security Implementation | Prometheus, Grafana, Linux/Windows, Azure

Monitored and maintained ICT systems, servers, and databases (PostgreSQL), and configured network devices including Cisco routers, switches, and Meraki appliances to ensure optimal performance.

Enforced strict information security and data protection procedures, such as securing application secrets in Azure Key Vault and implementing secure backup routines.

Optimized cloud resource usage by enhancing CI/CD pipelines to terminate automatically upon stage completion, preventing unnecessary compute costs (FinOps).

Managed user access controls and enforced compliance with ICT security procedures, observing strict role-based access controls (RBAC).

Enterprise Network Infrastructure Design & Security Implementation | Cisco IOS, IPv4/IPv6, OSPFv2, NAT/PAT, ACLs

Designed and deployed a multi-site enterprise network topology, configuring Cisco routers, Layer 2 switches, and DNS/Web servers with optimized physical cabling.

Implemented advanced routing using Single-Area OSPFv2 and Network Address Translation (NAT/PAT) to ensure efficient inter-VLAN routing and secure external internet connectivity.

Hardened network device security by configuring SSH, encrypted passwords, console/VTY line security, and Standard/Extended Access Control Lists (ACLs) to restrict unauthorized traffic.

Executed configuration backups via TFTP and verified end-to-end network connectivity, applying industry best practices for network segmentation and device hardening.

EDUCATION

BSc Computer Science, First Class Honors

South Eastern Kenya University | Graduated October 2022

Relevant Coursework: Distributed Systems, Networking, Software Engineering, Database Systems, Algorithms & Data Structures.

PROFESSIONAL CERTIFICATIONS

(Practical equivalents to Microsoft Azure Administrator / RHCSA through advanced hands-on cloud and Linux administration)

Cisco Certified Network Associate (CCNA) Track

- CCNA: Switching, Routing, and Wireless Essentials | Issued Jul 2026
- CCNA: Introduction to Networks | Issued Jul 2026
- ICTA: Enterprise Networking, Security, and Automation | Issued Jul 2026

Security, Cloud & Automation

- Introduction to Cybersecurity | Issued Feb 2026
- Digital Safety and Security Awareness | Issued Feb 2026
- Python Essentials 1 & 2 | Issued Jan 2026
- Introduction to Modern AI | Issued Feb 2026

KEY COMPETENCIES

Problem Solving & Troubleshooting: Strong analytical skills to diagnose and fix complex ICT, server, and network issues independently, effectively leveraging automation tools to prevent recurrence.

Vendor & Stakeholder Management: Excellent communication skills with a focus on coordinating with external vendors (ISPs, Cloud Providers) and resolving internal user inquiries promptly.

Organization & Documentation: Ability to manage multiple tasks, maintain detailed asset records, and adhere to ICT policies, ensuring all system configurations and troubleshooting steps are comprehensively documented.

Proactive System Administration: Creative approach to IT infrastructure, continuously looking for opportunities to automate manual tasks, improve system reliability, and enforce security best practices.

REFEREES

1. Mr. Ken

Supervisor, Kenya Revenue Authority (KRA)

Cell: 0701 416 600 | Location: Nairobi, Kenya

2. Mr. Migwi

Head of Information Systems Department, IEET

Jomo Kenyatta University of Agriculture and Technology (JKUAT)

Cell: 0722 507 887 | Location: Kiambu, Kenya

3. Mr. Robinson

Admin, Kenya Revenue Authority (KRA)

Cell: 0715 930 099 | Location: Nairobi, Kenya
